It should have a cover in a casual way,it should be used during in-class exercise. . best book for an aspiring civil engineer in the chemistry class12 i would like a book on this topic as i plan to be a civil engineer. CHAPTER 1 A QUICK LOOK AT BOOKS ABOUT PHYSICS Introduction. We have studied in the chapter one about linear motion and have seen how a person or a object in motion is treated mathematically as a function of time. In this chapter we will study the forces that keep things moving and we will learn the approximate mathematics that we can use to find the distance moved, the velocity, the acceleration, the kinetic and the potential energies, the force, the pressure, the work and the energy transfer. Class 12 Physics Chapter 1 Book. Then we have learnt to use the equation of motion to predict the trajectory of a falling object given the force that is exerted on it and the initial speed and position of the object. In this chapter we will learn more about forces and the equations of motion. Usually any student who has passed class 11 science has a general idea of linear motion. He/She will try to teach the students how to use the knowledge. Students of class 11 science may be able to answer many of the questions which we can ask. However, some questions a student of class 11 science may not be able to answer are: a) What happens if the initial speed of a moving body is zero, i.e. is at rest? b) What happens if the force on the object is zero, i.e. is not being applied to it? c) What happens if the object is at an infinite distance from the earth? d) What happens when the object is at the earth's surface and an unbalanced force is applied to it?.
