For instructions on how to use Passwordstate follow the link below. Download Passwordstate A developer has built a small utility that allows you to block Facebook access on Windows 8.1. The app, dubbed Facebook Blocker, works in the background and can be set to automatically block the Facebook app whenever it is launched. This was not initially meant to be the case, but other users have reported finding the app useful for helping them put the brakes on Facebook. Firstly, the programmer has set up Facebook Blocker to run continuously in the background with no user interface. The website explains, via the developer's blog: "When you log into your Facebook you have to give some personal details, like your birth date, and your location. This is used to create an accurate map for your profile, so that when you look at the map, you see the people who live near you. Location 09e8f5149f
